DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

2. Claims 28-33 are rejected under 35 U.S.C. 102(e) as being anticipated by Peidous et al. (US 6,027,982).

Peidous discloses the limitations of:

For claims 28-33:

trench isolation region formed within a substrate (35, fig. 4) electrically isolating adjacent active devices regions from each other, said planarized (fig. 11) trench isolation region containing rounded corners (38, fig. 7) between the top surfaces of the trench isolation region and the substrate (col. 3, lns. 36-41 and 62-67; col. 4, lns. 1-32).

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 28-33 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The examiner does not understand if the rounding is occurring to the trench corner or the trench liner and/or filler.
